PRO TIPS FOR APPLYING COLOR STREET NAILS STRIPS

- Use the alcohol wipes included in each set to prep your nails. Oil and dirt on nails may cause strips not to adhere properly.
- Apply before bed - letting nail strips cure on your nails overnight helps them last longer.
- Apply strips at room temperature and handle with warm hands. Nail strips become more pliable in the heat and more rigid in the cold.
- Hold strips in the middle for a more controlled application.
- Do not apply strips over cuticle or skin. Push back cuticles and apply strips against or slightly above cuticle so the strip adheres directly to the nail only.
- Crease the strip over the nail edge before removing excess with your nail or nail file.
- Apply thumbs last - start with pinky and work toward the thumb
- Avoid washing your hands and other activities with water for at least 30 minutes to allow the strips time to cure properly
- Use immediately after opening. Nail strips begin to dry when exposed to air.
